

I urge opposition to these bills and any others that increase the chances for voter fraud. Please consider that voting is an important privilege and the integrity of every vote is important to those who really care about the future of our state and country. Our 2020 federal election was a sham and most people recognize that voter integrity was not a concern to many. Concerned voters show up at the polls to cast their ballots with voter ID in hand and the disabled and people who will be outside of their voting district have the ability to request an absentee ballot be sent to them. We have all witnessed the fraudulent results that happen when voter ID and mail in ballots plus underhanded tactics are employed to sway an election, and must do everything possible to strengthen, not weaken our rules that insure vote integrity. This should be a non-partisan issue.
